

EMPLOYEE DATA ANALYSIS REPORT

EMPLOYEE DIVERSITY, INCLUSION & ORGANIZATIONAL PERFORMANCE

Employee perceptions of workforce diversity, inclusion practices, equity, belongingness and psychological safety

75 VALID RESPONSES · EXCEL & POWER BI

What the Analysis Found

- 75 valid employee responses measured on a five-point agreement scale
- Positive perceptions across all four dimensions, from 4.08 to 4.18 out of 5
- Inclusion and organizational performance are positively associated ($r = 0.606$, $p < 0.001$)
- Two gaps stand out: disability employment opportunities (3.29) and involvement in decision-making (3.76)
- Gender and age show no significant differences in perceived performance

STRONGEST FINDING

$$r = 0.606$$

Respondents who report stronger inclusion practices also tend to report stronger organizational performance ($p < 0.001$).

What This Analysis Set Out to Do

1

Identify practices

Identify the diversity and inclusion practices experienced by employees.

2

Examine drivers of performance

Examine how fairness, psychological safety, belongingness and organizational support relate to perceived employee performance.

3

Compare demographic groups

Assess whether perceived organizational performance differs across gender and age groups.

4

Measure key relationships

Measure the relationship between equity, belongingness, psychological safety and perceived organizational performance.

5

Translate into action

Translate the findings into practical management priorities for a more inclusive, higher-performing workplace.

How the Analysis Was Conducted

1

The Data

75 valid responses coded on a five-point agreement scale, from 1 (Strongly Disagree) to 5 (Strongly Agree).

2

The Workflow

Data cleaning, score construction, descriptive statistics, item-level analysis, reliability assessment, Pearson correlation, one-way ANOVA, demographic profiling, and open-ended themes.

3

The Tools

Microsoft Excel for data preparation and statistical analysis; Power BI to present the findings in dashboard form.

4

How to Read It

Correlation results are interpreted as associations and do not by themselves establish causation.

Positive Perceptions Across Four Dimensions

Mean score out of 5 for each analytical area

WORKFORCE DIVERSITY

4.08

out of 5

INCLUSION PRACTICES

4.08

out of 5

ORGANIZATIONAL PERFORMANCE

4.18

out of 5

RELATIONSHIP ASSESSMENT

4.08

out of 5

KEY INSIGHT

Scores sit in a close range (4.08 to 4.18), indicating broadly positive perceptions across the main dimensions.

Organizational Performance Scores Highest

Mean, median, standard deviation and share scoring 4 or above

HIGHEST MEAN

4.18

Organizational Performance records the highest average, followed closely by the other three dimensions at 4.08.

Two Items Fall Clearly Below the Rest

Five lowest item means (out of 5) and share who agree or strongly agree

DIV08

People with disabilities are given equal employment opportunities

PERF01

Employees are involved in decision-making that affects their work

INC01

Diversity is visibly promoted and celebrated

INC06

Comfortable expressing opinions without fear of judgment

REL04

Diversity commitment has positively affected customer relationships

LOWEST ITEM

3.29

Equal employment opportunities for people with disabilities, with 52.0% agreeing.

All Three Relationships Are Positive and Significant

Pearson correlations with Organizational Performance

Inclusion Practices vs Organizational Performance

0.606

Pearson r

p < 0.001 · SIGNIFICANT

**Equity, Belongingness & Safety
(Relationship Assessment) vs
Organizational Performance**

0.589

Pearson r

p < 0.001 · SIGNIFICANT

Workforce Diversity vs Organizational Performance

0.469

Pearson r

p < 0.001 · SIGNIFICANT

Inclusion Practices has the strongest relationship. Correlations show association, not causation.

No Significant Differences by Gender or Age

One-way ANOVA on perceived organizational performance

GENDER

F = 0.170

p = 0.681

NO SIGNIFICANT DIFFERENCE

AGE

F = 0.334

p = 0.801

NO SIGNIFICANT DIFFERENCE

CONSISTENT

No gap found

Perceived performance is relatively consistent across gender and age here. Continued measurement matters, as differences may emerge in other segments or over time.

Overall Scale Shows Strong Internal Consistency

Cronbach's alpha by scale

OVERALL ALPHA

0.864

Strong internal consistency across all 37 items. Workforce Diversity and Relationship Assessment have lower alphas and are best read alongside item-level patterns.

Strong Averages Can Hide Specific Gaps

DISABILITY ITEM

3.29

against a Workforce Diversity mean of 4.08, a gap of 0.79 points. A strong overall score can conceal gaps that affect specific employee groups.

WHY IT MATTERS

- Inclusion should be treated as part of organizational effectiveness, not as a separate workplace initiative.
- Involvement in decision-making (3.76) is the second gap and a chance to strengthen employee voice through structured feedback.
- Equity, belongingness and psychological safety also relate positively to how performance is perceived.

Priority Actions: Inclusion & Employee Voice

1

Prioritize Disability Inclusion

Review recruitment, accessibility, workplace adjustments and equal-opportunity processes, with measurable indicators of progress.

2

Increase Participation in Decision-Making

Strengthen feedback channels, consultative groups and listening sessions, and show how employee input affects decisions.

3

Strengthen Psychological Safety

Maintain safe channels for raising concerns and encourage leadership behaviours that allow open expression without fear of judgment or retaliation.

Sustaining Progress: Visibility & Measurement

4

Increase Visibility of Inclusion Practices

Communicate commitments through leadership messages, internal communication, recognition activities and periodic progress reports.

5

Monitor Inclusion and Performance Together

Repeat the measurement periodically and track inclusion indicators alongside performance perceptions to see change over time.

6

Manage by Specific Indicators

Use item-level findings to target interventions instead of relying only on one overall diversity or inclusion score.

Decision-making involvement

3.76/5

CONCLUSION & CALL TO ACTION

- Employee perceptions of diversity, inclusion and organizational performance are broadly positive.
- Inclusion and performance show the strongest positive relationship ($r = 0.606$, $p < 0.001$).
- The clearest opportunities are disability inclusion and employee involvement in decision-making.

IMMEDIATE PRIORITY

Disability Inclusion

Lowest-scoring item at 3.29 out of 5

NEXT MOST URGENT

Employee Voice in Decisions

Second-lowest item at 3.76 out of 5

Addressing these gaps while maintaining existing strengths can support a more consistent employee experience.
